

Interactive Fiction PBL Help

Useful actions:

"examine [person]" - this will examine whoever you replace [person] with, if you are unsure of someone's name use the phrase with which they are described.

"prescribe [drug] to [person]" - this will administer the drug to the person. The drugs coded for this case are blood, adrenaline and gelofusin. The [person] can be left out, if more than one person could be prescribed something then you will be prompted who you wish to prescribe to.

"go [direction]" - will move you in that direction to the adjoining room. The exits are listed in the black bar at the top of the screen and are printed whenever you change rooms.

"ask [person] about [topic]" - this will ask the patient a question and you will receive an answer. If in doubt, ask about history of presenting complaint, family history, social history, drug history and past medical history.
